- + 1x CR1620 battery
- + Set-up guide

## KeyBeacon, the Key and iPhone Finder by GEAR4

The KeyBeacon is a two-way key and iPhone finder that works in conjunction with the KeyBeacon App to invisibly link your iPhone and keys.

Simply attach the KeyBeacon to your key ring and download the KeyBeacon App to get started. Thanks to Bluetooth Smart, pairing your KeyBeacon with your iPhone is quick and easy.

Store multiple KeyBeacon profiles within the App and tap the relevant tab to search for your keys. The KeyBeacon will sound an alarm to guide you to your keys.

If it's your iPhone you can't find, simply press the button on the KeyBeacon to sound an alarm from your phone. Pick from the selection of in-App sounds to customize your alarm.
