A Tribute to Purity: Marantz PM6005 and CD6005 are ready to win the hearts of demanding yet price-conscious Stereophiles

Eindhoven, August 1st, 2013 – Marantz, a world leader in advanced audio technologies celebrating its 60th Anniversary in 2013, has been instrumental in conveying the true emotions of musicians by reproducing their music as faithfully as possible, just as they originally played it. Following that tradition, Marantz continuously updates its stereo collection. Now it is time for the new PM6005 Integrated Amplifier with digital inputs and CD6005 CD-Player. Stepping into the footsteps of their famous predecessors, both newcomers will again cause quite a stir in the entry-class category aiming at demanding yet price-conscious music lovers. They will be available in black or silver-gold from September onwards.

The PM6005 is more than an upgraded successor to the multi-award-winning PM6004. Much more. Because now you can connect this superb integrated amplifier directly to a vast range of digital sources and use its superior DAC to create an unbelievably high level of audio enjoyment with new media. Marantz has retained the pre-amp and power-amp sections that exclusively feature discrete components – not a single IC in sight of the signal path. That's because specially selected single components not only outperform ICs in quality, they also make it possible to refine the sound in much more detail, resulting in more clarity and transparency. Furthermore, it still has the low impedance shielded Toroidal transformer, as well as the customized main capacitors. And all of the original features - such as six-line analogue audio input including phono, two-pairs of gold-plated speaker connections with the convenience of bi-wiring or speaker A/B, and a remote handset - are all still there. But now, the PM6005 includes optical and coaxial digital inputs to connect a wide range of sources like a digital media player connected to the network or a TV / TV-box. The high-quality Digital-Analogue-Converter (DAC) is the 24bit/192kHz high current CS4398, which is already proven in many Premium Range products. And the complete digital section is fully shielded by an extra metal housing to ensure that the digital stage has no effect on the analogue signal. In short, the new PM6005 is a proven and excellent bridge to the future.

Press Release

Based on the “Best CD player under £500” by “What Hi-Fi Sound and Vision?” in 2012, the new CD6005 is a fine-tuned version with even more specially selected components like new customized block capacitors for the audio stage, high speed Schottky Diodes or the coppered stabilizer plate on the power regulator to minimize vibration. Marantz also added a solid metal bottom-plate and centralised the CD mechanism. That is how, for example, vibration is virtually eliminated. In addition, the oversized power supply feeds the digital and analogue circuitry of the player, where the same high-quality DAC as in the PM6005 converts digital signals to analogue, this is then ‘pushed’ to the gold-plated synch outputs by Marantz’s own small signal amplifier, the HDAM-SA2. Moreover, a new remote is included that also controls the PM6005 amp. There is also a new ‘low-power stand-by’ and ‘auto stand-by’ mode to save electricity. Altogether, the CD6005 is a match made in heaven for the music lover who wants nothing but the best performance at an attractive price. One more thing: it is also perfect for lovers of portable music, thanks to its iPod-digital connectivity.

CD6005 CD Player main features:

- CD, CD-R/RW playback, USB-A input Certified “Made for iPhone/iPod”
- Support of WAV, MP3, AAC , WMA file playback via USB-A input
- High quality 192kHz/24bit D/A conversion (CS4398) and accurate system clock
- HDAM-SA2 circuitry on board for high quality audio
- Customized audio components
- High Speed Schottky Diodes
- Coppered stabilizer plate for power regulator to minimize vibration
- Full discrete headphone amplifier
- Double layered bottom plate for extra stability
- Gold Plated L/R/Coax Outputs

PM6005 Integrated Amplifier with digital input main features:

- Integrated Current Feedback Amplifier with 2x 45W / 8 ohm rms
- Digital input (opt. / coax.) to extend connectivity
- Best audio from digital input signal by high quality DAC CS4398 and Marantz HDAM SA2
- Fully shielded DAC unit
- Gold Plated Inputs/Outputs incl. Phono (MM) input
- Marantz proprietary HDAM-SA3 circuits
- Toroidal Transformer and high quality customized components
- High quality Speaker Terminals (A / B switchable)
- System remote to control Amplifier, CD-Player and Network Player

About Marantz:

Marantz is a part of D+M Group. The company can trace its roots back to the dawn of the first mono LP, when Saul Bernard Marantz, a native of New York, was unhappy with the equipment available to play his cherished record collection on. So he had to build his own! Saul officially founded the Marantz Company in 1953. Then, as now, the company's cornerstones were quality and innovation. For over half a century Marantz has been developing unique technologies and bringing landmark hi-fi and home entertainment products to market through its tireless and extensive R&D programs. Such commitment to audio and video excellence ensures each Marantz design delivers class-leading performance. Additional information is available at www.marantz.eu.

About D+M:

D+M Group is a global operating company providing worldwide management and distribution platforms for premium consumer, automotive, commercial and professional audio and video businesses including Denon®, Marantz®, Boston Acoustics®, Denon DJ, D+M Professional and D+M Premium Sound Solutions. Our technologies improve the quality of any audio and visual experience. All product and brand names with a trademark symbol are trademarks or registered trademarks of D+M Group or its subsidiaries.
