MODEL 40n

The Most Musical Sound from Any Source

A luxurious analog feel and classic Marantz sound with a warm character and deep soundstage. Just add speakers.

INTRODUCING

MODEL 40n

Network Integrated Amplifier

The Most Musical Sound—
Now for the Streaming Age

The Most Musical Sound From Any Source

A full complement of analog and digital inputs plus built-in streaming and HDMI make listening enjoyable and easy regardless of source.

Stream Millions Of Hi-Resolution Songs

Stream from Spotify, Pandora, Tidal, and more or enjoy your own music file libraries. Works with Alexa, Google, and Siri.

HDMI Input Adds AV Connectivity

HDMI ARC (Audio Return Channel) adds uncommon flexibility to this stereo amplifier by enabling TV sound through your stereo

MODEL 40n Guide to Hi-Fi

All the functionality necessary to stream your favorite music, already built in.

Simply add speakers to hear The Most Musical Sound.

Vinyl is timeless. Connect your turntable to rediscover your favorite records.

Hear all your favorite movies and TV shows in vivid three dimensionality with one simple connection.

Expand your musical horizons by connecting your choice of analog and digital players.

A masterpiece of audio architecture, created with passion and extraordinary attention to detail, to bring you closer to the music and entertainment you love.

High-Resolution Digital Streaming Built-In

With HEOS® Built-in, you won't need extra equipment to stream your favorite tunes. MODEL 40n seamlessly connects to Spotify, AirPlay 2, Apple Music, Bluetooth, Tidal, TuneIn, and more services—plus, playback of your own collection via USB-A input or on compatible home servers. Access high-resolution personal file libraries, up to PCM 192 kHz/24-bit as well as DSD up to 5.6 MHz.

The Marantz Musical Phono EQ

The Marantz Musical Phono EQ is built in so you can connect a turntable with MM cartridge directly to MODEL 40n. You'll enjoy your favorite records and discover new ones, all without the burden of additional electronics.

Hyper Dynamic Amplifier Modules

To preserve the detail, nuance, and essence of the music you love, Marantz developed HDAM (Hyper Dynamic Amplifier Modules) which are superior in their speed and response to off-the-shelf modules found in other products.

Elevated Amplification

A new 70-watt-per-channel (8ohm) Class A/B amplifier stage has been developed that exceeds the performance of earlier models with similar power ratings. The Model 40n is highly dynamic and an excellent match for even difficult-to-drive speakers because of a lower impedance and higher instant current capability from a larger power supply transformer, four output transistors per channel, heavy copper bus bars, and very short pathways.

Luxurious Look and Feel

MODEL 40n follows a long line of historic Marantz pieces notable for their exquisite design. Every aspect is considered—from premium materials, symmetry, classic porthole display, and even smooth operation of the volume control. Your stereo doesn't need to look like lab equipment. Marantz MODEL 40n begs to be heard, seen, and touched.

Streaming Together or Separate – Whole-Home Audio

The MODEL 40n has been designed to work as the primary hub for one or multiple rooms. With HEOS® Built-in technology, you can play the same song in every room to create a festive mood or select different songs for each connected room by adding HEOS-capable speakers.

For an intuitive user experience, the MODEL 40n comes with a remote control, and conveniently works with Siri, Alexa, Google, and Josh.ai voice command systems as well as the Control4 smart home ecosystem.

A Perfect Pair

Celebrate your CD collection with a player engineered to sound better than any other in this class. Built with high-quality materials and Sound Master tuned, CD 60 adds precision CD playback to MODEL 40n or any fine audio system.
